

EVOLUTION RGB+Shape

The Satake **EVOLUTION**[®] now has the capability to consistently sort product by size and shape **without compromising or sacrificing capacity** for most applications.

A multi-year engineering and software development effort led to an industry leading defect recognition platform **focused on advanced shape sorting**. New proprietary algorithms help overcome and solve challenging product defect removals.

Satake is able to **achieve these superior results** through extensive field testing combined with valuable customer input.

Call or stop by a **local testing facility** to set up an in-person demonstration to see the Satake difference.
